## Frequently Asked Questions

### Q : Who must request an evaluation of his/her high school (or university) transcript?

A : Any student who has graduated from a high school outside of the United States or who has attended/graduated from a university outside of the United States.

### Q : English is the native/official language in my country. Do I still need to get an evaluation ?

A : Yes.

### Q : I have graduated from university. Do I need to request an evaluation for high school AND university ?

A : No. If you have graduated from university, then an evaluation of the university transcript is enough. However, if you have attended university but have not graduated, then we will require an evaluation of your high school transcript. In this case, the university transcript evaluation is optional.

### Q : I can't obtain my transcript. What should I do ?

A : Ask the evaluation agency for help in obtaining your transcript.

### Q: What kind of evaluation should I request?

A: For a high school transcript, a "document-by-document" evaluation is enough. For a university transcript, a "course-by-course" evaluation is best so that we can examine the transcript for potential transfer credits.

### Q: How much does an evaluation cost?

A: A "document-by-document" evaluation costs about \$85. A "course-by-course" evaluation costs about \$135-\$150.
